

Air-Weigh Trailer Scales

Communication

- Bluetooth to any smart device with the Air-Weigh app. View, store or e-mail weight data back to the office

Display

- Rugged outdoor display - no mounting box required
- Displays weight in 20 lb or kg increments
- Driver friendly, icon-based, touch screen
- Compensates for temperature and altitude
- Languages: English, Spanish, French and German

Calibration

- Factory calibrations built in for most popular suspension models
- PIN Protection & Dual-point calibration for accuracy at all weights
- Store up to four manual calibrations, great for trailers with multiple configurations

Alarms

- Outputs for warning and target thresholds, connects to user supplied light or horn

Accuracy

- Accurate to within 1% - Air / 3% - Mechanical suspension of a DOT-certified scale
- Tested operating temperature -40°F to 185°F
- Available for both air and most mechanical suspensions
- Tested to stringent SAE commercial vehicle standards

3-Year Limited Warranty

Made in the USA 

We have the Trailer Scale that's right for your application

LoadMaxx PLUS

- Bluetooth trailer weight data to any smart device with the Air-Weigh app
- RS-232 Integration communication capabilities
- Can be used as a standalone Trailer scale or...

Add the LoadMaxx Tractor scale for increased benefits

- Automatically read trailer weights in the cab with the LoadMaxx tractor scale on trailers equipped with LoadMaxx Plus
- Enables drivers to view steer, drive, trailer, GVW and net payload weights in-cab or on any smart device
- Automatic drop and hook capabilities - calibration stored in trailer scales
- Use NET Payload feature to determine cargo/product weight that has been loaded or off-loaded
- Include weight data when printing time/date stamped weight tickets using the optional printer
- Heavy Haul: Up to 7 trailer scale weights in a single heavy haul configuration will display individually on the in-cab display
- Tractor/trailer weight information can also be sent to the back-office via third party computer interface or via Air-Weigh app

QuickLoad PLUS

- Bluetooth trailer weight data to any smart device with the Air-Weigh app
- Economical standalone trailer scale that does not fall short on premium features
- Ideal for situations that don't need trailer weights in the cab
- Same accuracy and durability as LoadMaxx Plus, won't communicate to LoadMaxx equipped tractors

Know your weights as you load

Arm your trailers with Air-Weigh scales and eliminate the many costs associated with under-loading, overweight fines and checkweighing fees. An Air-Weigh Trailer scale provides you with real-time weights while you're loading in the field so that you load correctly the first time and every time.

Join the extensive family of satisfied Air-Weigh on-board scale customers

Ask your trailer representative to include Air-Weigh scales on your new trailers. Available as standard equipment or as a factory option with more than 200 trailer manufacturers and growing.
